

## **Power Settings for Mac**

- 1. Choose Apple Menu then System Preferences.
- 2. Click Energy Saver.
- 3. From here, you can choose how long you want your display to be on before it shuts down under the **Turn display off after** option.
- 4. To never shut down the computer, check **Prevent computer from sleeping automatically when the display is off** option & uncheck **Put hard disks to sleep when possible**.

	Energy Saver	Q Search
<ul> <li>Automatic graphics switching</li> <li>Your computer will automatically switch between graphics modes for better battery life.</li> </ul>		
Turn display off after:	Battery Power Adapter	3 hrs Never
<ul> <li>Prevent computer from sleeping automatically when the display is off</li> <li>Put hard disks to sleep when possible</li> <li>Wake for Wi-Fi network access</li> </ul>		
Enable Power Nap while plugged into a power adapter While sleeping, your Mac can back up using Time Machine and periodically check for new email, calendar, and other iCloud updates		
Battery is charged.		Restore Defaults
