

Power Settings for Windows 10

1. On the **Taskbar** in the **Search Bar** type in **Edit Power Plan** & click on **Edit Power Plan**.

2. For **Turn off the display**, choose the amount of time you want for the **Monitor(s)** to stay on before it shuts down.

The screenshot shows the 'Edit Plan Settings' window in Windows. The breadcrumb path is 'Control Panel > Hardware and Sound > Power Options > Edit Plan Settings'. The current plan is 'Balanced'. The 'Turn off the display' setting is currently set to '1 hour', and its dropdown menu is open, showing options from '1 minute' to 'Never'. The 'Save changes' and 'Cancel' buttons are visible at the bottom right.

Change settings for the plan: **Balanced**
Choose the sleep and display settings that you want your computer to use.

Turn off the display: 1 hour

- 1 minute
- 2 minutes
- 3 minutes

School of Engineering

- To select **Never Shut Down** computer, click on **Change advanced power settings**. A box will pop up & click on the “+” symbol next to the **Sleep** category to expand the list to **Hibernate after**. Then click on the “+” symbol next to **Hibernate after** which will expand the **Setting** option. In there select **Never**, then click on **Apply**, and then **OK** to save all changes.

Change settings for the plan: Balanced

Choose the sleep and display settings that you want your computer to use.

 Turn off the display: 1 hour
