

How to Check Your Zoom Voicemail Messages via Phone Call

1. Before we can check your Zoom voicemail messages via phone call, we need to set it up first. Open a web browser and enter “<https://usc.zoom.us>” into the address field and hit “Enter.”

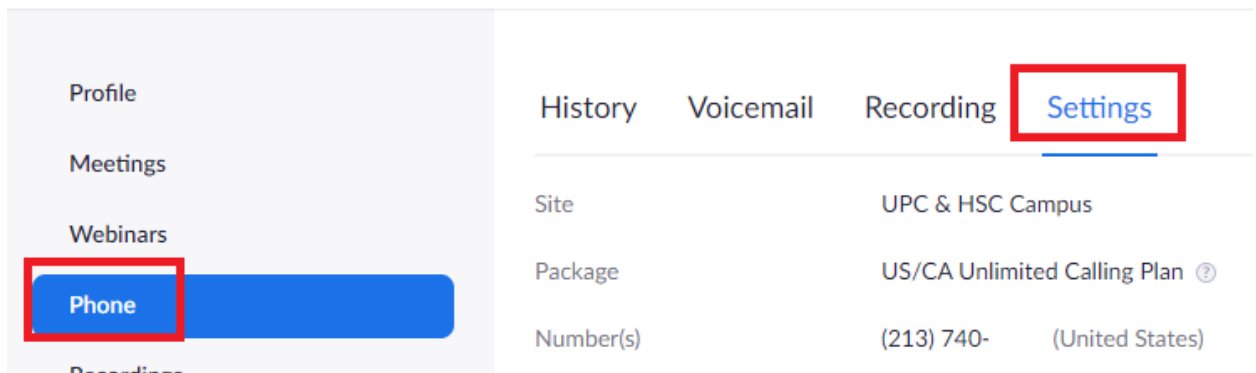

2. Click on the “Sign in” option and enter your shibboleth credentials.

Video Conferencing

3. In the Zoom Web Portal for your account, click on the “Phone” tab in the left panel and then click on the “Settings” tab.

8. To confirm that you have properly set the “Interactive Voice Response (IVR)” correctly: using your phone (not Zoom app), call your direct office phone number. You might see the Zoom app showing you a call from yourself, decline it so you can be prompted to the IVR.

The options at the time of this tutorial are as follows: “Press 2” to check to voicemail. Then enter your 8-digit PIN number followed by the “#” sign. Then “Press 1” to listen to your messages. After your message is played, you have the following choices: “Press 2” to save this message, “Press 3” to delete this message, “Press 4” to play this message again, and “Press 5” at any time to skip to next message. If you don’t select any of the options, then IVR will play the next message. If there are no more messages, it will exit.

For more information, regarding managing your voicemail messages, please see the following Zoom Support Link: <https://support.zoom.us/hc/en-us/articles/360060895712-Checking-voicemails-over-phone>
